## 4MP 40x Starlight WizMind Traffic Parking Network Camera

WizMind

Launched by Dahua Technology, Dahua WizMind is a full portfolio of solutions composed of project-oriented products including IPC, NVR, PTZ, XVR, Thermal and software platform which adopts industry-leading deep learning algorithms. Focusing on customer's requirements, WizMind provides precise, reliable and comprehensive AI solutions for industry verticals.

### System Overview

The 4MP 40x Starlight WizMind Traffic Parking Network Camera has a built-in neural network processor, and adopts advanced WizMind deep learning technology. With illegal parking evidence extraction, picture synthesis and law enforcement information collection functions, the device is suitable for various road scenes. With PTZ control, the cost of device deployment and scene adjustment can be greatly reduced. Multiple presets can be set at the same time to effectively increase coverage, and intelligent multi-scenario tour can be used to improve capture efficiency.

### Scenes

The device can be widely used in industrial parks, urban roads, elevated roads and some expressways which need wide monitoring and illegal parking evidence collection.

### Functions

#### Illegal Parking Capture

Deep learning algorithm is adopted to automatically detect illegal parking targets and identify vehicle attributes in the designated area. The camera supports zooming, capturing, and recognizing license plate number, vehicle type, vehicle color, license plate color and other motor vehicle attributes. And the combination of long shots, close shots and detailed license plate snapshots form a complete chain of illegal behavior evidence.

- Built-in ANPR engine, equipped with deep learning algorithm application
- Supports multiple tour modes to improve capture efficiency
- Supports connecting the speaker to use reminder functions such as voice broadcast of license plate number, and voice talk
- Continuous 360° horizontal rotation, -30° to 90° vertical rotation, and auto flip 180°; no blind zone
- IP67
- IR distance up to 500 m
- Auto-iris

### Multi-scenario Tour

The camera supports continuous 360° horizontal rotation, -30° to 90° vertical rotation, and auto flip 180°. Multiple presets can be set to expand the coverage, and the capturing radius is up to 150 m. It has the adaptive Detection Priority tour mode to effectively improve capture efficiency.

### Audio Linkage

The camera has 1 audio input port and 1 audio output port. After the external speaker is connected, reminder functions such as voice broadcast of license plate number and voice talk based on illegal behavior are supported.

### All-day Detection

The camera has a built-in smart rain sensor, and adopts advanced deep learning algorithm to effectively reduce the interference of the weather, so it can realize uninterrupted illegal parking capture and video monitoring in sunny, cloudy, rainy, and light snowy day.

### Protection

IP67: The camera has passed rigorous dust and immersion testing. The casing can protect the camera from dust inhalation, and it can be soaked in 1-meter-deep water for 30 minutes without causing harmful effects. Wide voltage: ±25% input voltage range is allowed, so that the camera can be widely used in outdoor environments with unstable voltage.

### PFA Technology

PFA technology has innovatively introduced new methods of judgment to ensure the accuracy and predictability of the direction of subject distance adjustment. The result is a set of advanced focusing algorithms. PFA ensures clarity of the image throughout the process of zooming and shortens focus time. The realization of PFA technology substantially improves user experience and increases product value.
